Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 13-26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

“an input device having inputs for executing a workout routine” – claim 13.

It is unclear how the workout routine is executed.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 13 is rejected under 35 U.S.C. 102(e) as being anticipated by Martinez.

Martinez discloses an input device having inputs for executing a workout routine fig. 1; and (ii) a display device having a display surface area; wherein the number of said inputs is less than or equal to five, and wherein the display surface area is less than or equal to two square inches fig. 1.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 14-16, 18-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Martinez.

As for the various species of claims 14-16, 18-20, they are all obvious in view of Martinez's inputs, given no unexpected results.

Martinez does not disclose said electronic recording device is provided in a wristwatch body, however, Martinez discloses wristwatches are old in the art col. 1, lines 21-25. It would therefore have been obvious to have Martinez's device on a wristwatch, for providing another means of a user wearing the device.

Claims 22-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Martinez in view of Ohlenbusch.

Martinez does not disclose a vibrating indicator mechanism for notifying a user to initiate a set of a resistance training exercise.

Ohlenbusch discloses a vibrating indicator "When employed, any of a number of outputs perceptible to the user 112 may be used, and the invention is not limited to any particular type of perceptible output. Examples of suitable output devices include: audio indicators such as buzzers, chimes, or voice synthesizers; visual indicators such as those capable of displaying numbers, text, symbols, and/or lights; and physical indicators such as vibrators."

It would have been obvious to use Ohlenbusch's vibrator means with Martinez's device, as it is well known as taught by Ohlenbusch, to use a vibrator means for providing feedback to an exerciser.

Ohlenbusch further discloses said electronic recording device is provided in a body of a sport wristwatch 104.

Claim 17 is rejected under 35 U.S.C. 103(a) as being unpatentable over Martinez in view of Michael.

Martinez does not disclose a rotating input device.

Michael discloses a rotating input device.

It would have been obvious to use Michael's input device, with Martinez's input, as it is well known as taught by Michael, to use a rotating input device, for inputting data into an exercise recorder.
